Amendment

1. Receipt is acknowledged of the amendment filed on March 29, 2004, responding
5 to Quayle action mailed on December 29, 2003. Currently, claims 1-6 remain for
examination.

Allowable Subject Matter

are directed at a data carrier comprising two interface means. The data carrier further
includes a first frequency sensor, a first frequency reset means and a second frequency
sensor, and second frequency reset means wherein the first frequency sensor resets the
reset means when a first clock frequency of the first clock signal or the first
15 communication signal lies below a first lower frequency threshold and the second
frequency sensor resets the reset means when a second clock frequency of the second
clock signal or the second communication signal lies below a second lower frequency
threshold. Such arrangement in a data carrier is not disclosed or suggested by previously
cited references.

- 20 Any comments considered necessary by applicant must be submitted no later than
the payment of the issue fee and, to avoid processing delays, should preferably
accompany the issue fee. Such submissions should be clearly labeled "Comments on
